

U.S. Serial No. 09/863,092  
Amendment & Response dated October 10, 2003  
Attorney Docket 7590.24US01

**Amendments to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the application.

**Listing of Claims:**

---

Claim 1. (Currently amended) A toy sled comprising:

(a) a body having a top surface and a bottom surface, the top surface adapted for receiving a plurality of riders thereon and the bottom surface comprising an engagement recess adapted for receiving a wheeled item and further comprising an attachment mechanism for removably securing the wheeled item in the engagement recess, the body defining a handle generally planar with the top surface and the bottom surface; and

d (b) a wheeled item removably secured to the engagement recess in the bottom surface of the body, the wheeled item comprising a square base piece having a first side and a second side, and at least four wheels rotatably connected to the first side of the base piece, the first side of the base piece positioned between the at least four wheels and the second side of the base piece, and the second side of the base piece secured to the body so that the at least four wheels extend away from the body.

Claim 2. (Currently amended) The toy sled according to claim 1, wherein the wheeled item is a floor scooter having four castor wheels connected to ~~[[a]]~~ the square base.

Claim 3. (Previously presented) The toy sled according to claim 1, wherein the bottom surface comprises a plurality of engagement recesses, each recess adapted for receiving a wheeled item therein.

Claims 4 and 5. (Canceled).

Claim 6. (Previously presented) The toy sled according to claim 1, wherein the attachment mechanism comprises a bolt.

U.S. Serial No. 09/863,092  
Amendment & Response dated October 10, 2003  
Attorney Docket 7590.24US01

Claim 7. (Original) The toy sled according to claim 1, wherein the body comprises a polymeric material.

Claim 8. (Original) The toy sled according to claim 7, wherein the polymeric material is polyethylene.

C1  
Claim 9. (Currently amended) The toy sled according to claim 1, wherein the body further comprises a defines a second handle generally planar with the top surface and the bottom surface.

Claim 10. (Original) The toy sled according to claim 1, wherein the body has a first end and an opposite second end, the first end having a connector and the second end having a connector receptor.

Claim 11. (Currently amended) A toy sled comprising:

(a) a body having a top surface and a bottom surface, the top surface adapted for receiving a plurality of riders thereon, the body further having a handle generally planar with the top surface and the bottom surface;

(b) the bottom surface defining a first scooter engagement recess including a first attachment mechanism receptacle centrally positioned in the first scooter engagement recess, and a second scooter engagement recess including a second attachment mechanism receptacle centrally positioned in the second scooter engagement recess, the first and second scooter engagement recesses longitudinally aligned, the first scooter engagement recess adapted to releaseably receive a first scooter comprising a base and a plurality of wheels rotatably attached to the base, and the second scooter engagement recess adapted to releaseably receive a second scooter comprising a base and a plurality of wheels rotatably attached to the base; and

(c) a first attachment mechanism for removably securing the first scooter to the first scooter recess using the first attachment mechanism receptacle and a second attachment

U.S. Serial No. 09/863,092  
Amendment & Response dated October 10, 2003  
Attorney Docket 7590.24US01

mechanism for removably securing the second scooter to the second scooter recess using the second attachment mechanism receptacle.

Claim 12. (Canceled).

C1 Claim 13. (Previously presented) The toy sled according to claim 11, wherein the attachment mechanism comprises a bolt.

Claim 14. (Original) The toy sled according to claim 11, wherein the body comprises a polymeric material.

Claim 15. (Original) The toy sled according to claim 14, wherein the polymeric material is polyethylene.

Claim 16. (Currently amended) The toy sled according to claim 11, wherein the body further comprises a second handle generally planar with the top surface and the bottom surface.

Claim 17. (Original) The toy sled according to claim 11, wherein the body has a first end and an opposite second end, the first end having a connector and the second end having a connector receptor.

Claim 18. (Currently amended) A sled body configured to have at least one wheeled item removably attached thereto, the sled body comprising:

- (a) a top surface adapted for receiving a plurality of riders thereon; and
- (b) a bottom surface comprising an engagement recess adapted for receiving at least one wheeled item having a 16 inch diameter and opposing handles therein;
- (c) the body having a length of about 53 inches, a width of about 23 inches, and a thickness from the top surface to the bottom surface of about 3 inches.
